

Citizens' Advisory Committee

Sub-Committee: Extracurricular

Potential Projects to Consider:

ATHLETICS

Priority 1

High Schools

- Guyer High School
 - Football | Soccer | Track : Demolition of miscellaneous site structures; renovation of existing Field House; New Field House to match Braswell Football FH; (1) artificial turf practice field & (1) natural grass practice field ; relocation of field events; site work and landscaping improvements; 5000 SF Concession/Toilet/Storage; scoreboard w/ 40 s clocks
 - Baseball : Demolition of miscellaneous site structures; ticket booth/entry; masonry scorer's booth; laser grade field; artificial turf skirt; scoreboard w/ digital board; sound system; replace lighting with LED; 1500 SF Concession/Toilet/Storage building; cover existing batting cage & add new masonry storage
 - Softball: demolish existing field and replace with new field and amenities to match Braswell & Ryan HS; new women's softball and tennis field house, concessions, restrooms
 - Tennis: (2) new courts including fencing, net, court striping & lighting; seating; new men's tennis field house; parking
 - Indoor Locker Room Additions & Renovations: Reconfigure athletic locker rooms; update finishes; new scoreboards; weight room addition
- Denton High School
 - Bronco Field : demolition of miscellaneous site structures; renovations and updates to Bronco Stadium to include renovation to home and visitor press box; enclose back and sides of grandstands and add 300 additional seats on Home side, new Visitor locker room, new LED stadium lighting, Concession/Toilet/Storage building
 - Track - Replace turf and resurface track, updates to field lighting, ticket booth & entry, scoreboard & 40 s clocks, Concession/Storage/Toilet building; ornamental fencing; relocation of field events
 - Baseball: Demo of misc. site structures; site work and landscaping; new ticket booth/entry plaza; laser grade field; new metal panel outfield fence; Concession/Toilet Building; covered batting cage w/ masonry storage; artificial turf skirt; replace backstop netting; turf bullpens; new LED field lighting, scoreboard w/ digital board; new sound system
 - Tennis: (2) Courts; storage/toilet building including utility placement

- Ryan High School
 - Football | Soccer | Track: Site landscaping & irrigation; Aluminum Visitors Grandstands for 500; relocate field events; new entry with ornamental fencing; new natural grass practice soccer field, 40 s clocks @ track field, new sound system @ track field
 - Baseball: new concessions and toilets; new grandstands to replace outside legs, new entry; laser grade field, irrigation mister system for infield; upgrade dugouts and bullpens, new synthetic turf skirt, new metal panel outfield fence, cover existing batting cage; new LED field lighting, scoreboard w/ digital board, new sound system
 - Tennis: Demolition of existing tennis courts, (8) new lighted tennis courts relocated to make room for practice field and to group all (8); concession/toilets/storage; entry
- Indoor Athletics: renovation of Gymnasiums to include new paint, bleachers, sound system, scoreboards, lighting and flooring, telescoping bleachers for Practice Gyms
- Braswell High School
 - Football | Soccer; new synthetic turf practice field
 - Baseball: new synthetic turf skirt, cover batting cages, new scoreboard with digital display
 - Softball: new synthetic turf skirt, cover batting cages, new scoreboard with digital display
 - Tennis: 2 New Courts
 - Indoor Athletics: Gym Addition

Priority 2

High Schools

- Ryan High School
 - New 60 yard synthetic turf practice field located between the Football and Multi-sport Field Houses
- Braswell High School
 - New 60 yard synthetic turf practice field located between the Football and Multi-sport Field Houses

Middle Schools

- Calhoun Middle School
 - Football | Soccer | Track: natural grass practice field w/ new irrigation, new 4 lane track (no structural spray), storage building
 - Tennis: Resurface (4) tennis courts including striping, netting and posts, replace galvanized chain link fencing, replace (2) backboards, provide hitting wall at one end of each court
 - Indoor Athletics: *Mount Gym* – new telescoping bleachers (300 seats), repaint walls & ceiling, refinish floor, new sound system; *McCalister Gym* – new telescoping bleachers (700 seats), repaint walls & ceiling, refinish floor, new sound system, updating finishes in boys and girls locker rooms, weight room expansion and updating finishes
- Strickland Middle School
 - Football | Soccer | Track: natural grass practice field w/ new irrigation, new

- 4 lane track (no structural spray), contingency to update field events (pole vault/high jump, shot put, discus ring & cage), storage building
 - Tennis: Resurface (4) tennis courts including striping, netting and posts, replace galvanized chain link fencing, provide hitting wall at one end of each court, replace (2) backboards, small masonry storage building
 - Indoor Athletics: *Auxiliary Gym* – new telescoping bleachers (300 seats), repaint walls & ceiling, refinish floor, new sound system, new scoreboards w/ wireless controllers, new wall pads, lift mechanisms for backboards; *Competition Gym* – new telescoping bleachers (700 seats), repaint walls & ceiling, refinish floor, new sound system, new scoreboards w/ wireless controllers, lift mechanisms for backboards, updating finishes in boys and girls locker rooms, weight room updates
- McMath Middle School
 - Football | Soccer | Track: natural grass practice field w/ new irrigation, new 4 lane track (no structural spray), contingency to update field events (discus cage), storage building
 - Tennis: Resurface (4) tennis courts including striping, netting and posts, replace galvanized chain link fencing, provide hitting wall at one end of each court, replace (4) backboard

Indoor Athletics: *Auxiliary Gym* – new telescoping bleachers (300 seats), refinish floor, new sound system, new scoreboards w/ wireless controllers, new wall pads; *Competition Gym* – new telescoping bleachers (700 seats), refinish floor, new sound system, new scoreboards w/wireless controllers, lift mechanisms for backboards, updates in boys and girls locker rooms, weightroom & fitness cardio room updates

- Navo Middle School
 - Football | Soccer | Track: natural grass practice field w/ new irrigation, new 4 lane track (no structural spray), contingency to update field events (pole vault/high jump, shot put, discus ring & cage), storage building
 - Tennis: Resurface (4) tennis courts including striping, netting and posts, replace galvanized chain link fencing, provide hitting wall at one end of each court, replace (8) backboards
 - Indoor Athletics: *Auxiliary Gym* – new telescoping bleachers (300 seats), refinish floor, new scoreboards w/ wireless controllers; *Competition Gym* – refinish floor, new scoreboards w/ wireless controllers, updates in boys and girls locker rooms, weight room & fitness cardio room updates
- Harpool, Myers, Rodrigues Middle Schools
 - Football | Soccer | Track: natural grass practice field w/ new irrigation, new 4 lane track (no structural spray), contingency to update field events (pole vault/high jump, shot put, discus ring & cage), storage building
 - Tennis: provide hitting wall at one end of all (4) courts (all three schools), resurface (4) tennis courts including striping, netting and posts (@ Myers and Rodriguez only)

District Wide Shared Facilities

- C.H. Collins
 - Field House Renovation: Renovate existing Hall of Fame to become office

- and conference space; technology and finish updates to reception & meeting room
- Stadium Renovation: Repainting all existing concrete; Add new LED up-lighting at entry; restriping parking

Priority 3

High Schools

- Guyer High School
 - 120 yard indoor practice facility including entry/lobby, office, restrooms, storage, batting cage netting, (6) Golf bays, fans and heating only
- Ryan High School
 - 120 yard indoor practice facility including entry/lobby, office, restrooms, storage, batting cage netting, (6) golf bays, fans and heating only
- Braswell High School
 - Expansion of Stadium: 8000 seats; concessions/toilets/parking; press box; visitor's locker room
 - 120 yard indoor practice facility including entry/lobby, office, restrooms, storage, batting cage netting, (6) golf bays, fans and heating only

District Wide Shared Facilities

- C.H. Collins
 - Practice Fields and Concession/Restroom Building: 1 artificial turf practice field and 3 natural grass practice fields; concession and toilets, home and visitor bleachers, lighting, scoreboards, and parking to serve the fields
 - Indoor Practice Facility; 120 yd practice field, includes entry/lobby space, office space, restrooms, storage, (6) golf bays

FINE ARTS

District Wide

- Upgrade all theatrical lighting systems (auditorium and cafetoriums) to LED instruments.
- Check all drapes in theatrical spaces and replace any that are older than 8 years old with IFR (Inherently Fire Resistant) drapes.
- All kilns and kiln rooms need to be checked and may be added to the needs. Kiln rooms should not double as storage. It is possible that some of our campuses need additional kiln rooms or storage spaces built for art. Programs are outgrowing spaces.

High Schools

- Denton HS
 - Addition of new 850 seat auditorium with 30x60 foot proscenium, ample wing space, full set of drapes, cyc, scrim, projection system, scene shop, prop and costume storage, set storage, dressing rooms, washer and dryer, hydraulic lift, motorized electrics, shells, clouds, digital sound, 20 wireless mics, LED lighting system, full fly system, lobby space, box office, faculty offices, and additional black box theatre (Performing Arts Center)
 - NOTE: Full counterweight system needed in new auditorium (Existing does not have full system, every other HS auditorium in the district does. This is an equity issue, and limits instruction on this campus).
 - Transition to LED lighting in existing auditorium and black box
 - Update ½ fly system in existing auditorium to meet safety standards.
 - Upgrade sound in current auditorium and blackbox.
 - Projection system needed in existing auditorium to accommodate large group meetings.
 - Open up light/sound booth in existing auditorium (currently enclosed space which is not conducive to running and balancing sound).
 - Climate controlled piano storage needed
 - Expanded dressing rooms needed in Fine Arts wing
 - Jazz Band Hall
 - Acoustically sound space (currently Jazz band rehearsal and class is held in a general ed classroom, with no soundproofing, beside the library).
 - Practice rooms
 - Storage space
 - Faculty office
 - Music library
 - Climate controlled storage for piano
 - Band Hall Improvements
 - Additional Storage needed for percussion equipment
 - Additional Storage for marching band equipment
 - Additional storage for uniforms
 - Currently the band rehearses outside the principal's office, with loud percussion disrupting the work environment. It may be possible to move the tower to the other

side of the parking lot, and send sound in a direction that doesn't disturb neighbors to remedy this. More study needed on this as a potential solution.

- "Balcony" level practice rooms needed in Choir room
- Art: New Kiln needed and possible additional kiln room needed
- Ryan HS
 - Addition of New 850 Seat Auditorium with 30x60 foot proscenium, ample wing space, full set of drapes, cyc, scrim, projection system, scene shop, prop and costume storage, set storage, dressing rooms, washer and dryer, hydraulic lift, motorized electrics, shells, clouds, digital sound, 20 wireless mics, LED lighting system, full fly system, lobby space, faculty offices, a box office and a black box theatre (Performing Arts Center).
 - Transition to LED Lighting in existing Auditorium and Black Box
 - Projection system needed in current auditorium
 - Existing auditorium needs new stage flooring
 - Replace all line sets in counterweight system in existing auditorium
 - Fire curtain is disabled and needs to be repaired or replaced
 - Rolling door needs to be repaired in existing space
 - Climate control needed in piano storage room
 - Expanded dressing rooms needed in Fine Arts wing
 - Addition of two art rooms, two storage rooms, and two dedicated kiln rooms needed (safety concern)
 - Sinks desperately needed in two art rooms at Ryan (this could be solved by addition of rooms)
 - Three-four storage rooms needed for supplies and potter's wheels
 - Band Hall improvements:
 - Second rehearsal space with adequate acoustics to serve concert band
 - 6 additional practice rooms needed for Band, including practice rooms with ample space for ensembles to rehearse
 - Locker room expansion in Dance/Drill team area needed to prevent sharing of lockers
 - Choir needs practice and storage rooms
 - Band needs new tower for marching band rehearsal
- Guyer HS
 - Climate controlled piano storage needed in auditorium
 - Grand piano needed in Choir area, with climate controlled storage
 - Sink needed in one art room at Guyer HS
 - Set storage space for stored theatre scenic elements
 - Fire curtain, safety hatches, and computer for counterweight system in Guyer Auditorium must be fixed.
 - Replace Drapes on stage and in Black box
- Braswell
 - Expansion of dance room needed. Footprint is too small for a campus this size, and is much smaller than any other HS campus in DISD.
 - Vent or electricity needed for clay mixer in Art Department. Expensive equipment is not usable due to lack of power/venting.

Middle Schools

- Strickland
 - Auditorium needs to be renovated/updated
 - Lighting transitioned to LEDs
 - Dimmers replaced with more current system
 - Booth needs to be open to house for proper mixing/balancing of sound
 - Seats need to be replaced or refurbished
 - Flooring needs upgrading or replacement
 - Band hall lacks projection and sound system

- Calhoun
 - Choir room has structural damage
 - Orchestra room expansion needed. More storage and more space needed in general
 - Auditorium booth (contains light and sound board) is on balcony and is not handicap accessible. A disabled student would not have opportunity to fully participate in learning sound or light in this space (which are part of the theatre TEKS).

- Crownover
 - Kiln does not work (see other Middle School issues)

- McMath
 - The principal has added a dance class, but has no dance space. A dance room with sprung floor, barres, and mirrors would help this campus. (see other Middle School issues).
 - New projector and screen

- All Middle Schools have issues with lighting & sound in cafetorium spaces.
 - There is no capacity for a light board in the cafetorium lighting systems. Lighting systems in middle schools across the district are antiquated.
 - Dimmers are so antiquated parts are becoming obsolete.
 - Sound systems in our Middle Schools need to be checked. Most, if not all, are outdated (cassette capability) and unreliable. Capability for wireless mics and bluetooth/digital sound needed.
 - Most Middle schools are extending the sizes of their aprons (area of the stage that extends beyond the grand drape) to accommodate large numbers of students. Building permanent stage extensions will help this temporary build issue.

Elementary Schools

- Lighting instruments need to transition to LED lighting in cafetoriums.
- Lighting Systems need to be checked to be sure dimmers have not become obsolete.
- Sound systems need to be checked for functionality and replaced with systems capable of running digital/wireless/bluetooth systems.
- Concern expressed by CAC committee member that there is overcrowding in art rooms on elementary campuses. Have surveyed art faculty (link below). Cannot discern whether this is a master schedule issue or a space issue yet. More information needed.
